

Your first Good Problem is due in class on Friday April 4. Good Problems are graded half on content and half on presentation. General presentation skills like grammar and spelling always count. The only specific presentation skills that you are responsible for so far are described in the *Layout* handout.

Problem: Write your mathematical autobiography. Include

- your background,
- your current interests and future goals,
- why you are taking this class,
- your preferred learning style(s), and
- whatever else is relevant or interesting.

The target length is 2 pages. To determine your preferred learning style, take the online test at <http://iliad.cats.ohiou.edu/vark/questionnaire.htm>. (Note that on this test you can choose more than one answer to each question.)
