

Your first Good Problem is due in class on Thursday September 9. Since this first good problem is specifically about you, do it individually instead of as a group.

Good Problems are graded half on content and half on presentation. The only specific presentation skills that you are responsible for so far are described in the *Layout* handout. The target length is 2 pages.

To determine your preferred learning style, take the online test at <http://www.vark-learn.com/english/page.asp?p=questionnaire> . (Note that you can choose more than one answer to each question.)

Problem: Write your mathematical autobiography. Include

- your background,
- your current interests and future goals,
- why you are taking this class,
- your preferred learning style(s), and
- whatever else is relevant or interesting.
