

Undergraduate Mathematics Seminar Biography

NAME*

August 21, 2018

This is an ungraded exercise intended to:

- let me know a little bit about you,
- generate a brief biography to be used in advertising your talk, and
- give you some practice using L^AT_EX and CoCalc.

This documents gives guidelines on what should be in a biography. It also serves as a template for the biography. Text in this color are instructions, which will be hidden in the final version. Text in this color are things to delete and replace.

1 Basic Facts

- Major: (actuarial, applied, ...)
- Status: (Jr., Sr)
- Courses past Calculus taken:
 - x
 - y

2 Mathematical Activities Outside Class

Describe activities such as Math Club, attending seminars or colloquia, going to conferences, participating in competitions, doing research, etc.

3 Medium-Term Goals

Explain what you want to do next (get a job doing X, go to graduate school in Y, ...)

4 Other interests

(minors, hobbies, ...)

5 Biographical Blurb

A short paragraph about you that could be used when advertising your talk.

*Ohio University, Mathematics
