

# Mathematical Autobiography Instructions

Martin J. Mohlenkamp

September 2, 2014

**Problem:** Write your mathematical autobiography. Include

- your background,
- your current interests and future goals,
- why you are participating in this project,
- your preferred learning style(s) according to the online test <http://www.vark-learn.com/english/page.asp?p=questionnaire>, and
- whatever else is relevant or interesting.

Use  $\LaTeX$  and make it look nice. At the next group meeting, you will project it so everyone can read it, ask questions, and critique the writing. After making improvements based on their comments, email me a .pdf version. It will be posted on the web for all eternity, so do not include anything confidential.
